

THE SIX

1 Nobody legitimate ever needs your seed phrase.

A request for it is not a sign of the scam — it **is** the scam, complete.

2 You call them. They never call you.

Hang up. Find the number yourself. The urgency is the mechanism.

3 Your seed never touches anything that syncs, backs up, or connects.

Paper, your handwriting, somewhere only you know. That's the whole technology.

4 Test with a small amount first.

If you can't get it back out, you never had it.

5 If getting money out requires paying money in, the money is already gone.

The demand for a fee is not an obstacle. It is confirmation.

6 Buy the device from the maker. Type the address yourself.

Not the marketplace. Not the ad. Not the top search result — that slot is for sale.
